

☐ You need to create two web pages:

1. Rewrite the HTML code of the following page: http://bit.ly/wp1042a1_r
2. Design a registration form followed by 「線上報名」

☐ 3/10 (Thu.) 5:00pm

[illegible]

Registration form

- ☐ 姓名(必填): 文字框 (最長10個字元)
- ☐ 學院(必填): 選擇框 (列出9個學院)
- ☐ 手機(必填): 文字框 (最長10個字元且只能為純數字)
- ☐ Email(必填): 文字框 (檢查email格式)
- ☐ 生日(非必填): 西元年／月／日
- ☐ 送出按鈕

Evaluation

- ☐ [20%] Create an event page and a registration page
- ☐ [10%] Validate HTML Code: <https://validator.w3.org/>
- ☐ [30%] Use HTML5 Semantic tags properly such as
 - ☐ nav, header, footer, article, section, aside
 - ☐ h1~h6, ol, ul, li, table, and etc.
- ☐ [10%] Add required attributes for each tag such as
 - ☐ alt, for, placeholder and etc.
- ☐ [30%] Format your code with the following rules:

HTML required rules

- ☐ Element and attribute names should all be lowercase.
- ☐ Use UTF-8 as character encoding.
- ☐ Use consistent indentation (tabs or spaces)
- ☐ Place all block/list/table elements on a separate line and indent child elements.
- ☐ Remove trailing white spaces from code.
- ☐ Use double rather than single quotation marks for attribute values.
- ☐ There should be no 'style' attributes present within the body of the HTML document. (It's acceptable to include HTML attributes for height and width of img elements)
